WHEREAS many regional service commissions, at present, do not have the regulations to evaluate gravel pits and rock quarries differently in terms of impact and optimal distance from residential areas, given the site-specific characteristics of proposed resource extraction sizes;

BE IT FURTHER RESOLVED THAT this Assembly urge the government to review its allowable quarry proximity to existing residential area regulation with the intent of increasing the catchment area with which the Department of Environment and Local Government,

regional service commissions and quarry developers are required to consult and that the minimum proximity to quarry regulation and/or legislation has its minimum distances expanded.

WHEREAS the population size of daycares is on the rise, requiring that the daycares often physically be located closer to larger often more urban centers to maximize their customer potential;

WHEREAS the Department of Education and Early Childhood Development already has a transportation system that covers the entire province on a daily basis, both morning and returning in the afternoon, however, they are not allowed to travel outside of their respective school catchment areas;

BE IT THEREFORE RESOLVED THAT the Legislative Assembly urge the government to grant an exemption, in elementary school catchment areas where no daycare infrastructure exists, of up to 10 km per day round trip to allow bussing of students; both for morning pickup and after school drop-off to daycare facilities outside the established school boundaries of the respective elementary school.
